

SmartXide Punto: The Gold Standard in CO₂ Skin Resurfacing

Reveal smoother, firmer and more radiant skin with SmartXide Punto, the CO₂ laser trusted by dermatologists worldwide.

Using advanced fractional technology, it revitalises the skin's surface and stimulates deep collagen renewal - improving fine lines, texture, and scarring for a visibly refreshed complexion.

The Smart Way to Renew and Refresh Skin

Fast treatment sessions

Minimal discomfort

Suitable for Fitzpatrick types (I-IV)

Safe and effective for resurfacing

Minimal downtime

SmartXide Punto: The Smart Way to Transform Your Skin.

Over time, the skin's natural collagen and elasticity can decline due to factors like sun exposure, ageing and lifestyle – leading to fine lines, wrinkles, uneven texture and loss of firmness.

SmartXide Punto uses advanced fractional CO₂ laser technology to resurface the skin, removing damaged cells while stimulating new collagen and elastin from within.

It smooths lines, refines texture and restores clarity and radiance – revealing a remodelled, more rejuvenated complexion.

- Smooths fine lines and wrinkles
- Improves skin tone and firmness
- Softens scars and stretch marks
- Restores natural radiance and clarity
- Refines uneven texture and enlarged pores

FAQs

Q: How does SmartXide Punto rejuvenate the skin?

A: SmartXide Punto uses fractional CO₂ laser technology to create precise micro-columns of energy in the skin, stimulating new collagen and elastin while gently resurfacing for a smoother, firmer appearance.

Q: What can SmartXide Punto treat?

A: It targets fine lines, wrinkles, uneven texture, large pores, scarring, sun damage, skin laxity and stretch marks.

Q: How does the treatment feel?

A: Most people describe a warm, prickling sensation. A topical anaesthetic can be applied for comfort, and any heat usually fades soon after treatment.

Q: Is there any downtime?

A: Mild redness or flaking may occur as the skin renews, with recovery typically taking a few days to a week.

Q: When will I see results?

A: Many notice smoother, fresher-looking skin after one session, with continued improvement as collagen renews over the following months.
